**29 August 2024**

**MARINE SECURITY BULLETIN – 25/2024**

**Dear Shipowners, Operators and Masters**

**Subject: Unmanned Surface Vessel Attack in the Red Sea**

On August 22, a tanker vessel was targeted by surface vessels and multiple rockets about 78 nautical miles Northwest of Hodeidah, Yemen. The vessel did sustain damage to starboard side aft deck and railings, as well as internal piping to the engine room causing water leakage. The crew and security team evacuated the ship with the assistance of a coalition naval vessel on August 22 and are currently ashore in Djibouti. Vessels transiting nearby on August 23 observed fires onboard the vessel. The vessel is loaded with crude oil and may present a pollution risk to the area. There is no report of injuries to the crew. Vessel is currently anchored in position 14-57'N 041-37'E.

**Security Level**

Liberian flagged vessels transiting the Red Sea, Gulf of Aden and Arabian Sea are to increase their security level to security level 3 and implement all protective measures in their Ship Security Plan. In addition, Liberian flagged vessels should avoid calling ports in Yemen. The decision to transit remains at the discretion of the Company, considering the number of recent targeted attacks on commercial ships.

**Recommendations**

The Liberian Registry encourages all vessels transiting the Red Sea to report to the UKMTO and register with the Maritime Security Centre for the Horn of Africa (MSCHOA) in accordance with industry BMP (Best Management Practices) and take advice from the collation forces operating in the area. Best Management Practices 5 (BMP5) will continue to provide the necessary guidance for shipping to ensure threat and risk assessments are developed for every voyage to mitigate the risks presented by remaining security threats in the region. The shipping industry will continue to monitor and advise on maritime security threats to assist the safe transit of vessels and the seafarers.

When operating within territorial seas or calling ports within the previously defined HRA as shown on UKHO Chart **Q6099**, Masters shall set the vessel security level to the level set by the port State authority but may implement security measures in excess of the security level set by the port authorities based on their assessment of the conditions in the port. When operating outside

territorial seas or ports within the previously defined HRA shown on UKHO chart **Q6099**, all Liberian flagged vessels shall operate at security level II. All security level changes should be reported directly to the Flag Administration by the Master via email [security@liscr.com](mailto:security@liscr.com).

The Liberian Administration strongly recommends that Vessels Owners, Characters, Operators and Ships Masters continue to carry out pre-voyage threat and risk assessments to consider the latest maritime security information from organizations supporting the Voluntary Reporting Area. In addition, Liberian flagged vessels may consider using a Private Maritime Security Company (PMSC) to provide additional armed or unarmed security personnel while transiting the high-risk area. For more information on PMSC, please go to: [Authorized Private Maritime Security Companies](#).
